

# SENTINEL NH<sub>3</sub>

ANHYDROUS ROW MONITOR

## YELLOW STREAKS GOT YOU DOWN?

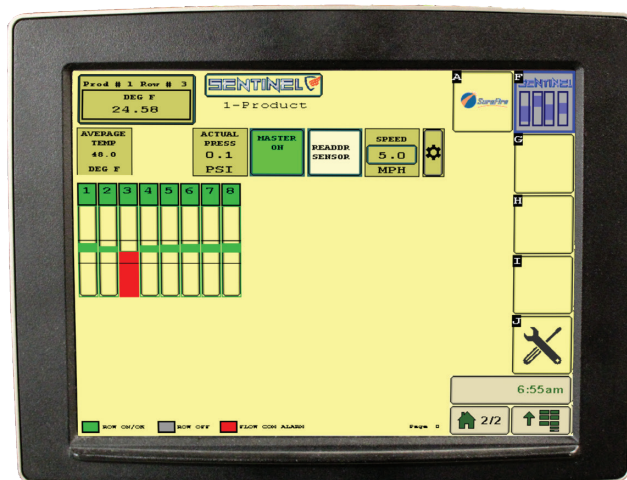

Uneven nitrogen application can cause yellow streaks in your crops. The Sentinel™ NH<sub>3</sub> system allows in-cab monitoring of the anhydrous to every row of the applicator.

- In-line Sensor Monitors Every Manifold Outlet
- Ensure Accurate Row-to-Row Application
- Detects Full or Partial Plugs
- Works with Any Rate Control System
- Add to Any Anhydrous System

## ISOBUS COMPATIBLE UTILIZE YOUR DISPLAY

Finally a solution to plugged rows on NH<sub>3</sub> applicators! Field proven sensor technology coupled with SureFire's Sentinel™ Isobus platform will give you peace of mind like never before.
